

Facts At A Glance

Mission: NYC Medics (NYCM) rapidly deploys to remote and difficult to access areas in disaster zones and complex humanitarian emergencies providing the highest level of medical care with dignity, integrity and compassion to people who would otherwise not have access to aid and relief efforts.

Who We Are: We are highly motivated professionals that are driven by the need to help and not stand by while people suffer. Our medical teams are self-sustainable and self-sufficient, capable of operating in remote difficult areas that would otherwise not be served or as part of a larger, established humanitarian operation. We work with local and international partners, in conjunction with other aid organizations and report daily to the disaster governing body. We are doctors, nurses, paramedics, physician assistants, public health professionals and experienced disaster relief experts that collectively provide initial aid efforts while paving the path for the larger organizations.

Our motto is light and lighter; more mobile, more flexible, more cost-effective, less bureaucratic.

Volunteer Model: Efficient and Effective. All medical providers volunteer their time and expertise to participate on NYCM deployments which typically require a commitment of 14 days.

Commitment to Fiscal Responsibility: 90 cents of every dollar donated goes directly toward NYCM global disaster relief programming.

Quick Stats

Since 2005, nearly 200 NYC Medics volunteers have provided life saving, emergent care to more than 26,000 people affected by natural disasters.

- 26,000 Total number of people treated by NYCM medical teams
- 325 Average number of people treated/day by NYCM teams
